Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-9 and 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Glover (US 375,350). Glover discloses a metal element (C) for coupling mechanical

pieces (a and b) comprising a first threaded portion (C5); a second portion having a diameter larger than the first portion and having a key (C4) extending outwards from its outer surface; a third portion (C3) having a diameter larger than the second portion and; a head portion (C2) above the third portion. As regards claims 14-16 they are product-by-process claims wherein it is only the resulting product considered for patent and the mower blades of claim 9 is an intended use limitation of which the metal element of Glover would be capable.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
